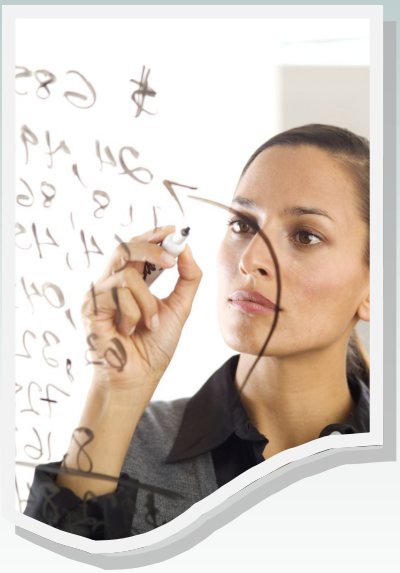
7th -12th Grade Mathematics



Veritas uses a multi-sensory approach to teaching mathematics in the upper grades. Our curriculum choice: Teaching Textbooks, uses an interactive DVD component that provides visual, tactile and auditory review of the daily lesson, and allows the parent to track how their student is doing lesson by lesson. Additionally, students can access solutions to the problems if they need additional assistance. Competent and caring math tutors teach the weekly skills, supplement, clarify and aid students to achieve comprehensive ACT/SAT preparedness in Math.

Math Classes Offered at all three locations

General Math
Pre-Algebra
Algebra 1
Algebra 2
Geometry
Pre-Calculus

Testimonials for Teaching Textbooks

Matt M. (Norman, OK)

"I made a perfect score on the math portions of both the SAT and the ACT. Teaching Textbooks covers all of the topics on these exams and gives you the conceptual understanding that you'll need to thrive as a future engineer."

Barbara F. (Oklahoma City, OK)

"My daughter finally gets it!!! This is the most understandable and student-friendly algebra program I've seen yet. The easy to understand lessons speak directly to the student and are written in clear language (not "Mathese"). So even the mathematically-challenged parent or student can grasp the concepts."
